KENSINGTON PRIVATE EQUITY FUND

MANAGEMENT DISCUSSION AND ANALYSIS

Kensington Private Equity Fund (“KPEF”) is an investment trust established under the laws of the Province of Ontario. KPEF is the successor to Kensington Global Private Equity Fund (“Global Fund”), which was established in a public offering of units in April 2007. On September 17, 2014, Global Fund transferred substantially all of its assets and transitioned into KPEF. Accordingly, the historical results and other characteristics of Global Fund are presented in this report as part of the historical results of KPEF. Effective April 1, 2016, KPEF’s regulatory status changed from being an “Investment Fund” to a “Corporate Finance Issuer”. This Management Discussion and Analysis (“MD&A”) is being published for investors in KPEF in accordance with its governing Declaration of Trust and the regulatory requirements applicable to it as a Corporate Finance Issuer.

Kensington Capital Advisors Inc. (the “Manager” and “Trustee”) believes that investing in private equity will continue to offer the potential for attractive long-term returns that have historically outperformed public equity market returns. A well planned private equity investment should reduce risk for traditional investment portfolios through diversification. The Manager provides investment advisory and portfolio management services to KPEF and is responsible for making all investment decisions.

RECENT DEVELOPMENTS

Performance of the Kensington Private Equity Fund

KPEF was created to provide investors with exposure to a diversified portfolio of private equity investments (“Underlying Investments”), including private equity funds and direct investments in private companies. By creating a hybrid private equity portfolio, the Manager believes investors will benefit from the potential for stronger returns from direct investments and the prudent risk management and diversification from investments in funds (“Underlying Funds”). This carefully managed hybrid portfolio strategy led to the following performance highlights during the 3-month period ended June 30, 2016:

- The Net Asset Value (NAV) of KPEF decreased by approximately \$0.8 million, representing a return to investors of approximately (1.1%). This calculation is determined on an internal rate of return basis based on the performance of Underlying Investments and without taking into account the impact of other cash flows into and out of KPEF during the period (new subscriptions, conversions, distributions and redemptions of Units). The comparable return for the same period last year was 1.7%, and the return for the 12 months ended June 30, 2016 was 10.6%.
- KPEF completed a new direct investment in White Swan Environmental Ltd., a private oilfield waste services company based in Northern Alberta. KPEF also made commitments to two new Underlying Funds: Trivest Growth Investment Fund and Providence Strategic Growth Fund II.

For the period ended June 30, 2016, KPEF distributed \$5.2 million to Unitholders, representing \$1.10 per Unit. As the value of KPEF grows and gains are realized, the Manager evaluates how much of these net realized gains will be returned as distributions to investors and how much will be re-invested into new opportunities.

Overview of the Investment Environment

In pursuing the KPEF investment strategy, the Manager evaluates broad economic developments as well as conditions specifically applicable to the private equity markets. Within the private equity markets, the Manager targets subsectors and geographic regions that it believes offer the best opportunities for strong returns as well as receptive markets for the sale of mature portfolio companies. The new KPEF investment in White Swan Environmental is an example of investing in Alberta at a time when the regional market is weak, while also targeting an environmental solutions company for an industry in need of improvement in environmental practices.

Economic Environment

Investors face ongoing geopolitical uncertainty related to terrorist threats and attacks, continued volatility in oil prices, political uncertainty related to the upcoming U.S. presidential election, and market volatility as a result of the recent Brexit referendum in the U.K. North American stock markets have remained volatile, while fixed income investments continue to deliver historically low returns. Alternative investments, including private equity, have provided significant diversification opportunities for portfolios seeking additional long-term gains. Looking ahead, the Manager expects continued slow growth in the Canadian economy with somewhat stronger growth in the U.S., but subject to greater risks arising from the geopolitical risks described above. The Manager believes that regions and industries that may be temporarily out of favour can lead to attractive investment opportunities.

Current Private Equity Market Conditions

The Manager believes the best private equity investment opportunities at this time continue to be in the mid-market buyout, growth equity and venture capital sectors in Canada and the United States. Low interest rates and a growing economy together with aging business owners combine to create a positive environment for new buyout opportunities, while the continued expansion of mobile communication, content and commerce has created a dynamic venture capital cycle with the opportunity for significant gains. These areas have been the focus of KPEF during the period, and are expected to continue to be targeted in the year ahead.

The market remains open to sales of mature companies from private equity portfolios, as high quality businesses continue to be acquired by strategic and financial buyers at attractive prices. Public markets continue to be relatively cautious about initial public offerings (IPOs), although KPEF has seen several successful IPOs from within its portfolio during the last year with some continued interest in pending IPO opportunities. However, the Manager generally believes that selling portfolio companies to strategic corporate buyers is a more reliable means of realizing gains.

As distributions from private equity funds grow, many private equity investors have increased their allocations to private equity. Accordingly, the Canadian private equity market continues to grow. Despite its relatively attractive investment environment, the Manager believes that Canada continues to be overlooked by global private equity investors and is underserved relative to other jurisdictions. As a result, the Manager continues to favour Canadian private equity opportunities in the portfolio strategy of KPEF, as the flow of high quality investment opportunities from Canada remains very strong.

During the past year, multiples for private equity buyouts have been rising and credit availability has strengthened. In this environment, the Manager is taking a disciplined approach to new buyout investments and has declined to participate in transactions for high quality companies that it believes to be overpriced or over levered. The Manager remains confident that it can continue to source attractive opportunities for KPEF in the current market and believes that this pricing trend reinforces the importance of due diligence, discipline and a broad market perspective when investing in the private equity markets. The Manager has sought to maintain good liquidity in the KPEF portfolio in order to be in a position to capitalize on attractive opportunities.

As noted above, the Manager is capitalizing on the active venture capital and growth equity markets, which have historically represented approximately 30% to 40% of the KPEF portfolio. Based on the strength of opportunities available in these sectors, their overall allocation currently lies above the normal target range. One of the reasons for this excess is the increase in value of Underlying Investments, some of which have grown into much larger, more mature companies while they have been held by KPEF but remain part of the venture capital and growth equity sector. The Manager expects this excess allocation to be temporary, with reversion to KPEF's historical range in the year ahead as investments are sold.

Summary

KPEF's portfolio has matured to the stage where the Manager now expects to see a steady flow of exits from the sale of portfolio companies. The Manager expects that the frequency of exit transactions and the aggregate value received by KPEF from these exits will continue at a similar pace to its recent experience, as long as portfolio companies continue to perform and market conditions remain favourable.

The unique structure of KPEF provides for the reinvestment of capital from the sale of investments (unlike other private equity funds that typically return all capital to their investors) and the addition of new commitments from investors on an ongoing basis. This structure allows KPEF to continue to make new investments, year after year, as the Manager continuously renews the portfolio. As a result, the Manager believes now that the portfolio has reached this stage of maturity, KPEF is well positioned to continue to generate value for investors in the future.

The Manager does not expect to see dramatic economic improvements in the near term. Private equity investors can succeed in the current slow growth economy with interest rates remaining at historic lows where they have the capability and network for sourcing attractive investments. With corporate buyers still under pressure to acquire growth in a weak economy, the Manager expects the exit market to remain healthy through the year ahead.

RESULTS OF OPERATIONS

KPEF's investment objective is to maximize long-term total returns for Unitholders through distributions of net income and net realized capital gains from Underlying Investments, while managing risk through prudent diversification.

Current Portfolio of Underlying Investments

The Manager maintains a portfolio of diversified private equity investments, consisting of:

- investments in private equity funds to provide the diversification required to manage risk, combined with significant allocations to direct investments in companies to enhance returns;
- secondary investments to accelerate and diversify the timing of capital flows and returns over primary fund investments;
- investments in the buyout sector, growth equity, venture capital and other sectors, in order to provide investors with access to different segments of the private equity market through a single investment in KPEF; and
- private equity investments located primarily in Canada and the U.S., allocated in a manner consistent with the Manager's expertise and its views on the most compelling investment regions and opportunities.

The investment strategy used to construct the portfolio of KPEF relies upon the Manager's proactive sourcing of proprietary deal flow and active management of the portfolio. This investment strategy is also designed to provide investors with access to private equity investments that would otherwise be unavailable to them, by capitalizing on the Manager's relationships with leading private equity fund managers, and from the scale achieved from combining their resources with other investors in KPEF.

As at June 30, 2016, KPEF held investments in 24 primary funds, 3 independent secondary fund portfolios, 15 direct investments, and 2 funds of funds. The Manager continues to review private equity investment opportunities on an ongoing basis in order to best achieve KPEF's investment objective.

In accordance with the Declaration of Trust governing KPEF, the Manager has the responsibility for establishing target portfolio weighting guidelines by geographic region, investment type and investment sector, with the expectation that the actual weightings will vary over time depending on market conditions and available opportunities, among other factors.

The target portfolio allocations and actual weightings at June 30, 2016 are set out below:

By geographic region:

In addition to the 15 direct investments in private companies, the KPEF portfolio as of June 30, 2016, includes Underlying Investments in indirect investments in private companies through primary and secondary fund portfolios, and much smaller indirect investments in many additional private companies through the international fund-of-funds portfolio. These companies are diversified across multiple industry sectors, as set out in the chart below.

KPEF NET ASSET VALUE

Underlying Investments:

As at June 30, 2016, KPEF held Underlying Investments in private equity totaling \$85.8 million representing 85.3% of the NAV. During the period, KPEF realized certain private equity investments, resulting in a shift from unrealized gains reported in prior periods to realized gains in the current period. Excluding the impact of net new subscriptions and distributions of (\$0.5) million, the net asset value of Underlying Investments decreased by (\$0.3) million during the period.

Liquid Investments:

KPEF invests directly in Underlying Funds by committing and advancing capital as such amounts are drawn down by the respective managers of the Underlying Funds. Capital held by KPEF pending investment in private equity investments is invested in a variety of financial products (“Liquid Investments”) such as government securities, money market instruments and investment-grade securities, as well as listed securities of private equity funds and other securities consistent with the overall objectives of liquidity, capital preservation and an appropriate return.

As at June 30, 2016, KPEF held Liquid Investments totalling \$15.7 million, representing a decrease of \$2.3 million over the \$18.0 million of Liquid Investments held at March 31, 2016. At June 30, 2016, Liquid Investments comprised 15.6% of the NAV.

Management Expense Ratio:

KPEF's Management Expense Ratio (MER) is reported in accordance with applicable accounting standards and securities laws. The MER is based on total expenses for the stated period and is expressed as an annualized percentage of the net average assets during the period. The reported MER for KPEF includes expenses incurred by Underlying Funds. Unlike typical mutual fund expenses, the expenses incurred by these Underlying Funds will be recovered by KPEF prior to any such Underlying Fund's managers earning a performance fee. The recoveries of these expenses will be recorded as portfolio gains at the appropriate times, and will not be reflected in any adjustment to the MER at those times. The Manager has also calculated the unrecoverable portion of the MER during the relevant periods ("Unrecoverable MER"), as the reported MER less the amounts expected to be recovered from Underlying Funds as described above.

RELATED PARTY TRANSCATIONS

The KPEF investment portfolio includes investments in two funds managed by the Manager: KPEF has invested \$5,673,575 in Kensington Hedge Fund 1, and KPEF has committed \$23,850,000 to Kensington Venture Fund, LP, which will be drawn down by that fund over a 13-year period. As of June 30, 2016, the total amount funded by KPEF into Kensington Venture Fund was \$445,972. In each case, these related party investments have been structured to ensure there is no duplication of management fees paid by KPEF to the Manager.

RISK FACTORS

KPEF is subject to a number of risks, including all of the risks described in the KPEF Offering Memorandum dated June 30, 2016.

FORWARD LOOKING STATEMENTS

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent the Manager's expectations regarding future events. By their nature, forward-looking statements must be based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. Readers of this document are cautioned not to place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed in the forward-looking statements. Actual results may differ materially from the Manager's expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, foreign exchange rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which KPEF may invest and the risks detailed from time to time in KPEF's Offering Memorandum, Annual Information Form and other investor documentation. The foregoing list of factors is not exhaustive and when relying on forward-looking statements to make decisions with respect to investing in KPEF, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, neither KPEF nor the Manager undertakes, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.
