KENSINGTON PRIVATE EQUITY FUND
MANAGEMENT DISCUSSION AND ANALYSIS

Kensington Private Equity Fund (“KPEF”) is an investment trust established under the laws of the Province of Ontario. This Management Discussion and Analysis (“MD&A”) is being published for investors in KPEF in accordance with its governing Declaration of Trust and the regulatory requirements applicable to it as a Corporate Finance Issuer.

Kensington Capital Advisors Inc. (the “Manager” and “Trustee”) believes that investing in private equity will continue to offer the potential for attractive long-term returns that have historically outperformed public equity market returns. A well-planned private equity investment should reduce risk for traditional investment portfolios through diversification. The Manager provides investment advisory and portfolio management services to KPEF and is responsible for making all investment decisions.

RECENT DEVELOPMENTS

Performance of the Kensington Private Equity Fund

KPEF was created to provide investors with exposure to a diversified portfolio of private equity investments (“Underlying Investments”), including private equity funds and direct investments in private companies. By creating a hybrid private equity portfolio, the Manager believes investors will benefit from the potential for stronger returns from direct investments and the prudent risk management and diversification from investments in funds (“Underlying Funds”). This carefully managed hybrid portfolio strategy led to the following performance highlights for the quarter ended June 30, 2017:

- The Net Asset Value (NAV) of KPEF increased by approximately \$25 million, consisting of new subscriptions received from investors, together with unrealized gains/losses.

The NAV per Unit increased during the period by 6.9%, determined on an internal rate of return basis based on the performance of Underlying Investments, and taking into account the impact of other cash flows into and out of KPEF during the period (new subscriptions, conversions, distributions and redemptions of Units). The comparable return for the same period last year was (1.1%).

- KPEF completed two new direct investments, in Kinetrex Energy Investment L.P. and Mobile Service Center Canada Limited.
 - A co-investment with Parallel49 Equity Fund V, Kinetrex Energy is a liquified natural gas manufacturer based in Indianapolis, Indiana. The LNG is used by the local utility as a reserve and by logistics and agricultural companies as fuel for heavy equipment. Kinetrex’s Midwest location provides a strategic advantage over many of its key competitors as its proximity to customers provides a structural cost advantage.
 - Mobile Service Center Canada Limited is a chain of professional smartphone repair stores operating under the ‘Mobile Klinik’ brand specializing in immediate repair of mobile phones and tablets for consumers with a swift, high quality and standardized service level.

Overview of the Investment Environment

The Manager evaluates broad economic developments as well as conditions specifically applicable to the private equity markets. Within the private equity markets, the Manager targets subsectors and geographic regions that it believes offer the best opportunities for strong returns as well as receptive markets for the sale of mature portfolio investments.

Economic Environment

Interest rates have begun to rise in Canada and the United States for the first time in years, while the Canadian dollar has moved up aggressively in the past few months. As NAFTA renegotiations get underway, we continue to be concerned about the potential impact of protectionism. There continues to be a lot of cash in portfolios

and the demand for yield investments seems to be insatiable. The Manager seeks to navigate the KPEF Fund through this economic environment, including with a view to the potential impact of protectionist policies. Alternative investments, including venture capital and private equity, have provided significant diversification opportunities for portfolios seeking returns that are not tied to the public markets.

Current Private Equity Market Conditions

The Manager continues to see a steady flow of opportunities in the mid-market buyout, growth equity and venture capital sectors. In the continuing low interest environment, purchase multiples on buyouts have been rising to cyclically unattractive levels. As a result, the Manager is focused more on growth and venture investments - where the relentless pace of technology innovation continues to spawn attractive new companies - than on buyout investments. Mature companies can be attractive but the pricing must be sensible in order to be able to achieve acceptable returns. Another very important factor is the opportunity to develop and grow the business that creates real lasting value to generate significantly better returns than organic growth might allow. The demographics of business ownership, with baby boomer founders seeking liquidity for retirement, continue to create opportunities for the mid-market buyout sector as a whole. KPEF is in a strong position to pursue these deals on attractive terms through the Manager's strong network of proprietary business relationships.

The market remains open to sales of mature companies from private equity portfolios, as high quality businesses continue to be acquired by strategic and financial buyers at attractive prices. Public markets have become receptive to initial public offerings (IPOs) again and KPEF is targeting some IPO exits during the coming year. The Manager is also working on the sale of portfolio companies to strategic corporate buyers as a means of realizing gains.

The Manager remains confident that it can continue to source attractive opportunities for KPEF in the current market and believes that this pricing trend reinforces the importance of due diligence, discipline and a broad market perspective when investing in the private equity markets, including in today's active venture capital and growth equity markets. The Manager has sought to maintain good liquidity in the KPEF portfolio in order to be in a position to capitalize on attractive opportunities.

Summary

KPEF's portfolio has matured to the stage where the Manager expects to see a steady flow of exits from the sale of portfolio companies. The Manager expects that the frequency of exit transactions and the aggregate value received by KPEF from these exits will continue at a similar pace to its recent experience, as long as portfolio companies continue to perform and market conditions remain favourable.

The unique structure of KPEF provides for the reinvestment of capital from the sale of investments (unlike other private equity funds that typically return all capital to their investors) and the addition of new commitments from investors on an ongoing basis. This structure allows KPEF to continue to make new investments, year after year, as the Manager continuously renews the portfolio. As a result, the Manager believes now that the portfolio has reached this stage of maturity, KPEF is well positioned to continue to generate value for investors in the future.

The Manager does not expect to see dramatic economic improvements in the near term. Private equity investors can succeed in the current slow growth economy with interest rates remaining at historic lows where they have the capability and network for sourcing attractive investments, and the experience and skill set to enhance the company while it is part of the portfolio. With corporate buyers still under pressure to acquire growth in a slow economy, the Manager expects the exit market to remain healthy through the year ahead.

RESULTS OF OPERATIONS

KPEF's investment objective is to maximize long-term total returns for Unitholders through distributions of net income and net realized capital gains from Underlying Investments, while managing risk through prudent diversification.

Current Portfolio of Underlying Investments

The Manager maintains a portfolio of diversified private equity investments consisting of:

- investments in private equity funds to provide the diversification required to manage risk, combined with significant allocations to direct investments in companies to enhance returns;
- secondary investments to opportunistically take advantage of market dislocations;
- investments in the buyout sector, growth equity, venture capital and other sectors, in order to provide investors with access to different segments of the private equity market through a single investment in KPEF; and
- private equity investments located primarily in Canada and the U.S., allocated in a manner consistent with the Manager's expertise and its views on the most compelling investment regions and opportunities.

The investment strategy used to construct the portfolio of KPEF relies upon the Manager's proactive sourcing of proprietary deal flow and active management of the portfolio. This investment strategy is also designed to provide investors with access to private equity investments that would otherwise be unavailable to them, by capitalizing on the Manager's relationships with leading private equity fund managers, and from the scale achieved from combining their resources with other investors in KPEF.

As at June 30, 2017, KPEF held investments in 27 primary funds, 3 independent secondary fund portfolios, 20 direct investments, and 2 funds of funds. The Manager continues to review private equity investment opportunities on an ongoing basis in order to best achieve KPEF's investment objective.

In accordance with the Declaration of Trust governing KPEF, the Manager has the responsibility for establishing target portfolio weighting guidelines by geographic region, investment type and investment sector, with the expectation that the actual weightings will vary over time depending on market conditions and available opportunities, among other factors.

The target portfolio allocations and actual weightings at June 30, 2017 are set out below:

In addition to the 20 direct investments in private companies, the KPEF portfolio as of June 30, 2017, includes Underlying Investments in indirect investments in private companies through primary and secondary fund portfolios, and much smaller indirect investments in many additional private companies through the international fund of funds portfolio. These companies are diversified across multiple industry sectors, as set out in the chart below.

***KPEF Industry Weightings of Private Equity Investments (Fair Value)
June 30, 2017***

KPEF NET ASSET VALUE

Underlying Investments:

As at June 30, 2017, KPEF held Underlying Investments in private equity totaling \$124.1 million representing 70.7% of the NAV. During the year, KPEF realized certain private equity investments, resulting in a shift from unrealized gains reported in prior periods to realized gains in the current period. Excluding the impact of net new subscriptions of \$21.9 million, the net asset value of Underlying Investments increased by \$3.5 million during the period.

Liquid Investments:

KPEF invests directly in Underlying Funds by committing and advancing capital as such amounts are drawn down by the respective managers of the Underlying Funds. Capital held by KPEF pending investment in private equity investments is invested in a variety of financial products (“Liquid Investments”) such as government securities, money market instruments and investment-grade securities, as well as listed securities of private equity funds and other securities consistent with the overall objectives of liquidity, capital preservation and an appropriate return.

As at June 30, 2017, KPEF held Liquid Investments totalling \$51.6 million, representing an increase of \$27.8 million over the \$23.8 million of Liquid Investments held at March 31, 2017. At June 30, 2017, Liquid Investments comprised 29.3% of the NAV. The Manager expects most of that liquidity to be used in the coming months as several investments that have been in due diligence and documentation are closed.

Management Expense Ratio:

KPEF's Management Expense Ratio (MER) is reported in accordance with applicable accounting standards and securities laws. The MER is based on total expenses for the stated period and is expressed as an annualized percentage of the net average assets during the period. The reported MER for KPEF includes expenses incurred by Underlying Funds. Unlike typical mutual fund expenses, the expenses incurred by these Underlying Funds will be recovered by KPEF prior to any such Underlying Fund's managers earning a performance fee. The recoveries of these expenses will be recorded as portfolio gains at the appropriate times and will not be reflected in any adjustment to the MER at those times. The Manager has also calculated the unrecoverable portion of the MER during the relevant periods ("Unrecoverable MER"), as the reported MER less the amounts expected to be recovered from Underlying Funds as described above.

RELATED PARTY TRANSCATIONS

The KPEF investment portfolio includes investments in two funds managed by the Manager: KPEF has invested \$13,773,575 in Kensington Hedge Fund 1 and KPEF has committed \$23,850,000 to Kensington Venture Fund, LP, which will be drawn down by that fund over a 13-year period. As of June 30, 2017, the total amount funded by KPEF into Kensington Venture Fund was \$126,714. In each case, these related party investments have been structured to ensure there is no duplication of management fees paid by KPEF to the Manager.

RISK FACTORS

KPEF is subject to a number of risks, including all of the risks described in the KPEF Annual Information Form dated June 30, 2017.

FORWARD LOOKING STATEMENTS

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent the Manager’s expectations regarding future events. By their nature, forward-looking statements must be based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. Readers of this document are cautioned not to place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed in the forward-looking statements. Actual results may differ materially from the Manager’s expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, foreign exchange rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which KPEF may invest and the risks detailed from time to time in KPEF’s Offering Memorandum, Annual Information Form and other investor documentation. The foregoing list of factors is not exhaustive and when relying on forward-looking statements to make decisions with respect to investing in KPEF, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, neither KPEF nor the Manager undertakes, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.
